LifePoints® Funds - Target Date Series

When you invest in Russell LifePoints® Funds, Target Date Series your investment is instantly diversified across a selection of asset classes, managers, and includes a range of target investment styles. This series includes nine funds - eight target date strategy funds, and the In Retirement Fund. Each fund is professionally advised and designed to help manage risk, while at the same time striving to deliver long-term results. Russell’s investment approach is different from single-manager funds. We strive to provide consistent above-average returns by extending beyond any one manager or market.

While the investment styles employed by the money managers are intended to be complementary, they may not in fact be complementary. A multi-manager approach could result in more exposure to certain types of securities and higher portfolio turnover.

Please remember strategic allocation and diversification do not assure profit or protect against loss in declining markets.

Target Date Strategy Funds investment objective
Seeks to provide capital growth and income consistent with its current asset allocation which will change over time, with an increasing allocation to fixed income funds.

In Retirement Fund investment objective
Seeks to provide income and capital growth.

Your challenge: Getting to retirement
With the Target Date Series, you simply select a retirement date and then let the broadly diversified fund automatically adjust along the way. The chart below, known as a glide path, illustrates how the asset allocation for the target date strategy funds becomes more conservative over time. The funds reach a final fixed allocation of 27% equity funds, 7% alternative funds, and 66% fixed income funds.

The asset allocation of the In Retirement Fund is consistent with the allocation at the end of the existing target date glide path. The In Retirement Fund maintains a fixed asset allocation of equity, alternative and fixed income funds. In this way, you can still take advantage of the potential returns available through stocks while minimizing risk with fixed income funds.

Asset allocation glide path

Russell Investments is a trade name and registered trademark of Frank Russell Company, a Washington USA corporation, which operates through subsidiaries worldwide and is part of London Stock Exchange Group.

Securities products and services offered through Russell Financial Services, Inc., member FINRA, part of Russell Investments.

Mutual Fund investing involves risk, principal loss is possible.

Fund objectives, risks, charges and expenses should be carefully considered before investing. A summary prospectus, if available, or a prospectus containing this and other important information can be obtained by calling 800-787-7354 or by visiting www.russell.com. Please read a prospectus carefully before investing.

Because each Target Date Series fund invests in a diverse set of underlying funds in different asset classes, you don’t have to create your own portfolio of funds. The pie charts below provide a visual example of how the funds at either end of the glide path use different proportions of the underlying Russell funds to accomplish this. Their allocations differ to accommodate the different investor time frames of each fund.

The date in each fund name represents the approximate date of your retirement. The principal value is not guaranteed at the target date or any other time.

**2020 Strategy Fund**

- Commodity Strategies: 2.3%
- Emerging Markets: 3.0%
- Global Equity: 5.4%
- Global Infrastructure: 2.3%

- U.S. Dynamic Equity: 5.0%
- U.S. Small Cap Equity: 8.5%

The LifePoints® Funds are a series of fund of funds which expose an investor to the risks of the underlying funds proportionate to their allocation. Investment in LifePoints® Funds involves direct expenses of each fund and indirect expenses of the underlying funds, which together can be higher than those incurred when investing directly in an underlying fund.

Each of the LifePoints® Funds, Target Date Series funds, invests its assets in shares of a number of underlying Russell Funds. The allocation of each Strategy Fund’s assets is based solely on time horizon and will become more conservative over time until approximately the year indicated in the Fund’s name, at which time the allocation will remain fixed. The asset allocation of the In Retirement Fund is fixed. From time to time, the fund’s adviser expects to modify the target strategic asset allocation for any fund and/or the underlying funds in which a fund invests including the addition of new underlying funds. In addition, the fund’s adviser may also manage assets of the underlying funds directly for a variety of purposes.

There can be no assurance that the 2055 Fund will grow to an economically viable size, in which case the Fund may cease operations. Investors may be required to liquidate or transfer their investments at an inopportune time. The client should consider their investment goals, time horizon and risk tolerance before investing in any fund.

For more information on Russell LifePoints® Funds or underlying Russell Funds, contact your investment professional or plan administrator for assistance.

The Select U.S. Equity and Select International Equity Funds are new funds. There can be no assurance that a new Underlying Fund will grow to an economically viable size, in which case the Underlying Fund may cease operations. A Fund may be required to liquidate or transfer its investment in the Underlying Fund at an inopportune time.

The Select U.S. Equity and Select International Equity Funds utilize a variety of quantitative inputs and qualitative assessments in their management. If these are not predictive or are incorrect, the Funds may underperform. These Funds also utilize index replication and/or optimization strategies, which may cause their returns to be lower than if they employed a fundamental investment approach to security selection.

Certain underlying Funds within the LifePoints® Funds may invest in derivatives, including futures, options, forwards and swaps. Investments in derivatives may cause the Fund’s losses to be greater than if it invests only in conventional securities and can cause the Fund to be more volatile. Derivatives involve risks different from, or possibly greater than, the risks associated with other investments. The Fund’s use of derivatives may cause the Fund’s investment returns to be impacted by the performance of securities the Fund does not own and result in the Fund’s total investment exposure exceeding the value of its portfolio.
For all Underlying Funds except the Select U.S. Equity and Select International Equity Funds, the tables below lists the funds' third-party money managers. Russell manages the fund’s liquidity reserves and may manage assets to effect the fund’s investment strategies and/or to actively manage the fund’s overall exposures to seek to achieve the desired risk/return profile for the funds. This may constitute 5% or more of fund assets at any given time. For the Select U.S. Equity and the Select International Equity Funds, Russell directly manages all fund assets and the tables below provides information on each fund’s portfolio managers.

<sup>1</sup> The allocation of the LifePoints® Target Date Series Funds to the underlying funds is approximate and changes over time. Performance numbers reflect a fund’s historical allocation to the underlying funds.

<sup>2</sup> Performance shown for Class R1 shares prior to June 7, 2006 (commencement of operations) is the performance of the fund’s Class E shares. Performance is based upon the actual mix of underlying funds recommended at each specific point in time, which may differ from the current mix. Details of past changes to underlying funds and/or allocations are available upon request.

All performance information is historical and does not guarantee future results. Investment return and principal value will fluctuate so that redeemed shares may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Current to the most recent month-end performance for Russell mutual funds is available by visiting www.russell.com/fundperformance.

Performance is reported net of fund advisory and administrative fees, and gross of financial intermediary fees.

† The Net Annual Operating Expense Ratio may be less than the Total Operating Expense Ratio and represents the actual expenses expected to be borne by shareholders after application of:

- (a) a contractual transfer agency fee or advisory fee waiver through February 29, 2016;
- (b) a contractual cap and reimbursement on expenses through February 29, 2016;
- (c) a contractual agreement to permanently waive the advisory and administrative fees paid by the Fund in an amount equal to the advisory and administrative fees paid by the Subsidiary. This contractual agreement may not be terminated.

Unless otherwise stated, these contractual agreements may not be terminated during the relevant periods except at the Board of Trustee’s discretion. Details of these agreements are in the current prospectus. Absent these reductions, the fund’s return would have been lower.

1. The Russell Emerging Markets Fund and the Russell Short Duration Bond Fund are reported gross of advisory and administrative fees prior to April 1, 1995.

2. The Fund first issued Class Y Shares on September 29, 2008. The returns shown for Class Y Shares prior to that date are the returns of the Fund’s Class S Shares.

3. The Fund first issued Class Y Shares on March 30, 2000. The returns shown for Class Y Shares prior to that date are the returns of the Fund’s Class I Shares.
